Hangleton Youth Band

Risk Assessment Procedure:

June 2017.

Risk Rating

Risk Assessment involves reviewing each hazard and rating it according to the severity of it occurring combined with the likelihood of it occurring. The decision about what action to take will be influenced by the rating. E.g. A high risk rating of $5 \times 5 = 25$ would require immediate and careful action.

Assessing the likelihood of a hazard and the severity of outcome is based on the following **severity scale for physical injuries**:

Severity Scale	1	2	3	4	5
Likely injury	Minor nonimmobilizing injury or trauma not requiring hospital treatment	Non-immobilizing injury or trauma but requiring hospital treatment	Immobilizing injury or trauma requiring hospital treatment	Severe injury or trauma requiring urgent hospital treatment	Very severe life-threatening event

and a likelihood scale for a hazard occurrence:

Likelihood Scale	1	2	3	4	5
Hazard occurrence	Highly unlikely	Unlikely	Possible	Likely	Very likely
